

The Lash Lift is a very low maintenance procedure compared to eyelash extensions, however, there is a little extra care required over the first 24-48hrs whilst the lift is still settling into place and a few tips to help you get the longest results.

- A daily-use serum/conditioner is recommended to apply to lashes or brows to strengthen and nourish the hairs (this can be purchased)
- In order to maintain the look comb your eyelashes upwards from root to tip every day after the treatment. In the case of brow lamination comb eyebrows to your desired shape
- Avoid getting your lashes/brows wet
- Avoid any creams to the eyes
- Avoid steamy atmospheres such as saunas, facial steamers or very hot showers
- Be gentle with your lashes; no rubbing
- Do not use harsh products on your eyes/lashes
- No eye make up for 24 hours
- Do not use eyelash curlers
- Avoid waterproof mascara
- Swimming should be avoided for at least 24hrs. Be aware swimming can weaken and shorten results
- No other facial beauty treatments for 24hrs
- Remember, the lash lift/brow lamination procedure is similar to a hair perm, and as such the hair must be kept well nourished and treated delicately to avoid breakage/weakening
